Ply Gem®

Entrance Doors
inspired by you.

2020/21 Edition

A good home **deserves a great door.**

Your front door is the gateway to your home. It reflects your personality and welcomes visitors. Keeps out the elements and provides security. Impresses buyers and rewards your investment.

With Ply Gem, you can choose from a vast range of entry doors. In steel or fiberglass. With or without glass, sidelites and transoms. We also offer Garden doors, a modern alternative to a patio door. As you learn more about them, you'll see why builders and homeowners throughout Canada beat a path to our doors.

3 steps
to your
new door.

What does your door **look like?**

That depends on the style of your home, personal preference and budget. If your front room or hallway is dark, a glass insert, sidelites or a transom can brighten the scene. As you thumb through this brochure, follow our guidelines to lead you to the ideal door for your home.

1 Select a style

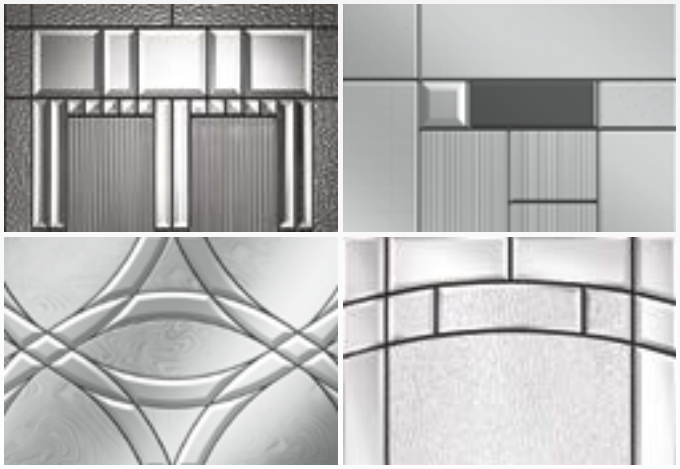

Choose a door that's compatible with your home's architectural style. Embossed panel doors enhance the look of traditional style homes. Flush or slab doors have a more contemporary look. Most styles are available with or without glass. For tips on how to match our doors to architectural styles, see page 6.

2 Choose a material

Our fiberglass entry doors recreate the look of traditional wood panel doors and can be stained or painted. Tough as nails, they won't dent, warp, crack or rot and provide insulation values up to R-7.

Our steel entry doors combine a durable metal skin and a foam insulated core that provides insulation values of R-8. Available in a variety of designs, they can be painted to complement your home's exterior.

3 Decorate with glass

Glass inserts are available in a variety of shapes and sizes. Options range from clear to opaque and include decorative glass in a wide array of patterns. Whether you want glass in your door or not, sidelites and/or transoms present another option. They can transform a humble entry into a grand entrance.

Enhance your home's **style.**

The most appealing homes have one thing in common. All the elements that make up the exterior work together. You wouldn't put a flush steel panel door in a Craftsman home. But when choosing your door, there are certain door, glass and grid styles that complement particular architectural styles. Here are some examples to help guide your selection.

Arts & Crafts

Rustic textures, low-pitched roofs and wide overhanging eaves typify this home style.

Includes home styles such as:

CRAFTSMAN | PRAIRIE | BUNGALOW | RANCH

Traditional

Strong, straight lines with decorative trim and crown moulding above the door and windows are common with this home style.

Includes home styles such as:

COLONIAL | VICTORIAN | SHINGLE | TUDOR

Modern

This geometric style combines shapes and angles in unexpected ways for an innovative approach to home design.

Includes home styles such as:

MODERN | POST-MODERN | CONTEMPORARY

Welcome to
lasting beauty.

Entry **Doors**

We love the natural look of traditional wood doors. But in our climate, wood is prone to warping and rot. Our fiberglass entry doors are constructed to prevent warping, corrosion and rotting. They're more durable than wood and require less maintenance. Modeled from traditional wood panel doors, they look identical to wood stained or painted. And provide up to six times the insulation.

Our steel panel entry doors combine a durable steel skin with a polyurethane foam core. They hold paint better than wood and provide superior insulation. Available in flush or embossed panel designs, they can be painted to match your home's colour scheme.

Beauty that's more than **skin deep.**

Our Fiber Stain doors offer the beauty of traditional wood doors without the risk of warping, rot or rust. All our doors are compression molded to provide high impact strength. That means they'll stand up to the knocks and kicks of everyday use without so much as a ding or dent.

Choose from five grain patterns:

FIR
The fine grain of Douglas fir.

MAHOGANY
A tight hardwood grain that produces a rich finish.

CHERRY
A straight uniform hardwood grain.

RUSTIC
A deep grain and plank detail that resembles distressed wood.

OAK
A distinctive oak grain pattern.

All can be stained to complement your home's colour scheme. Available in 6′ 8″ and 8′ sizes, they can be configured with a wide array of glass options.

A door that **fits your life.**

Nothing creates a warm welcome like a brightly painted front door. And no wood door holds paint as well as our Fiber Tuff fiberglass doors. Like all Ply Gem fiberglass doors, our Fiber Tuff doors won't dent, warp, rot or rust and insulate up to six times better than wood doors. Choose from a variety of flush and embossed panel styles in 6′ 8″ and 8′ sizes. Most styles can be configured with glass.

Express yourself in a colourful way.

Smooth surface holds paint well. More durable than wood, it won't dent, warp, crack rot or rust.

Value is always **in style**.

One of the most secure doors you can buy, our steel entry doors offer exceptional value, superior performance and outstanding beauty. Because it doesn't absorb moisture like wood, the steel skin holds paint longer. It also prevents rotting, swelling and cracking. A thick polyurethane foam core helps insulate your home from heat, cold and outside noise. Backed by a 10-Year Warranty, our steel entry doors are available in 6'8" or 8' heights. Custom sizes also available.

You don't have to be a Rockefeller to have a grand entrance. Our steel entry doors come in classic and contemporary styles and can be cut to fit almost any opening.

Steel Skin

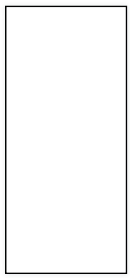

24-gauge galvanized steel skin won't rot like wood and resists rust.

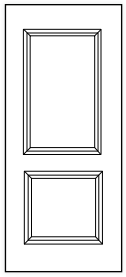

Custom Sizes

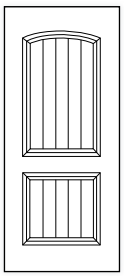

New construction or renovation, our steel doors can be cut to fit.

Signature **Series**

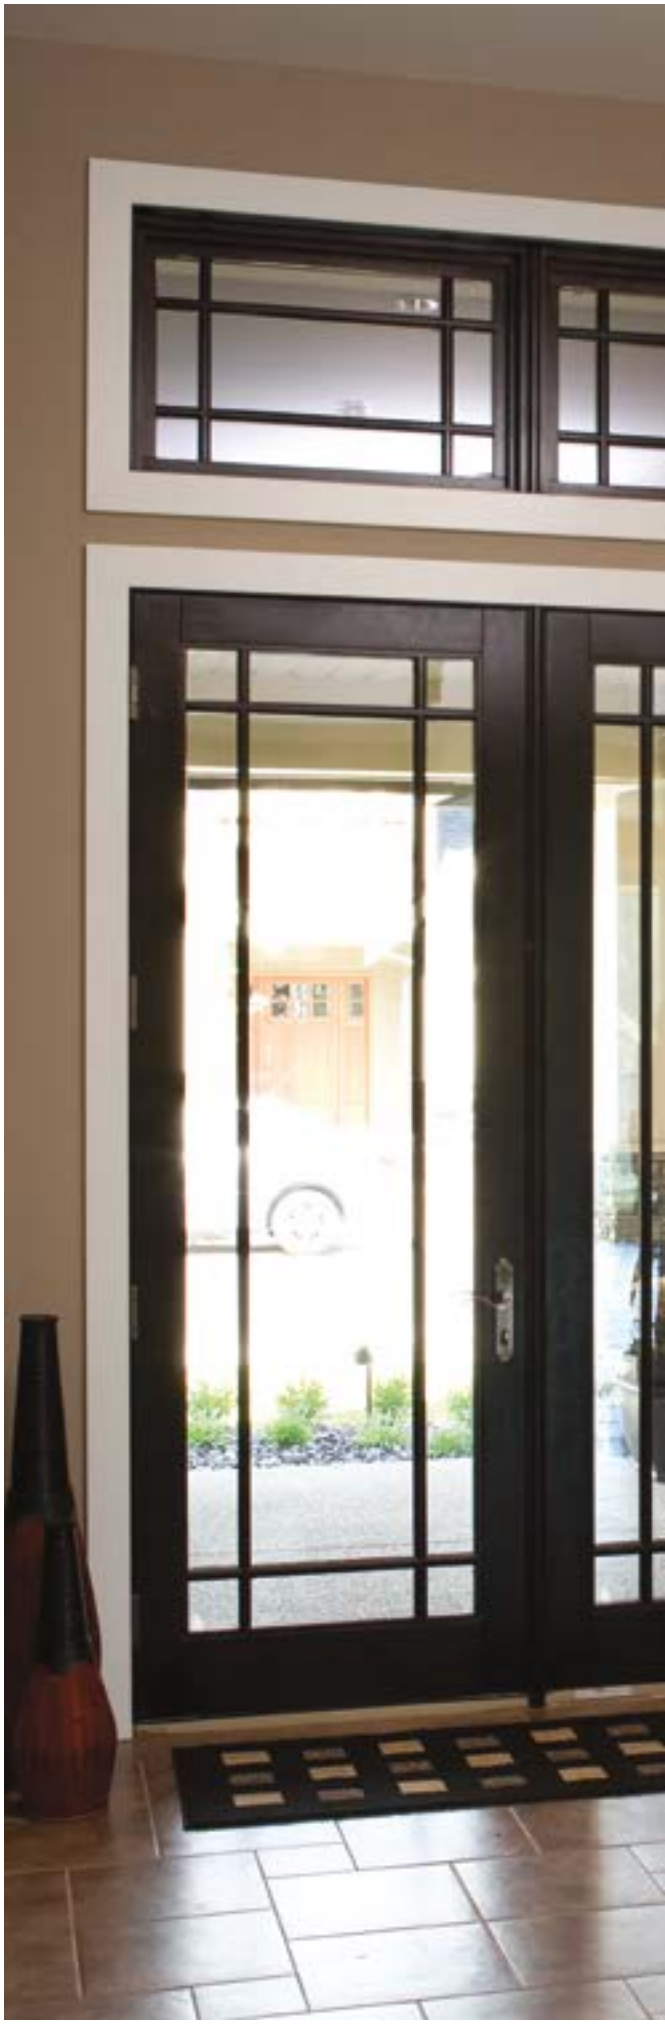

Aluminum-Clad Wood doors

Featuring a beautiful wood interior and maintenance free exterior aluminum cladding, Signature Series doors provide the classic beauty of a traditional French style door.

Classic Appearance, modern engineering

Signature Series Hinged French doors can be used to create a stunning front entranceway or as an alternative to a traditional sliding patio door.

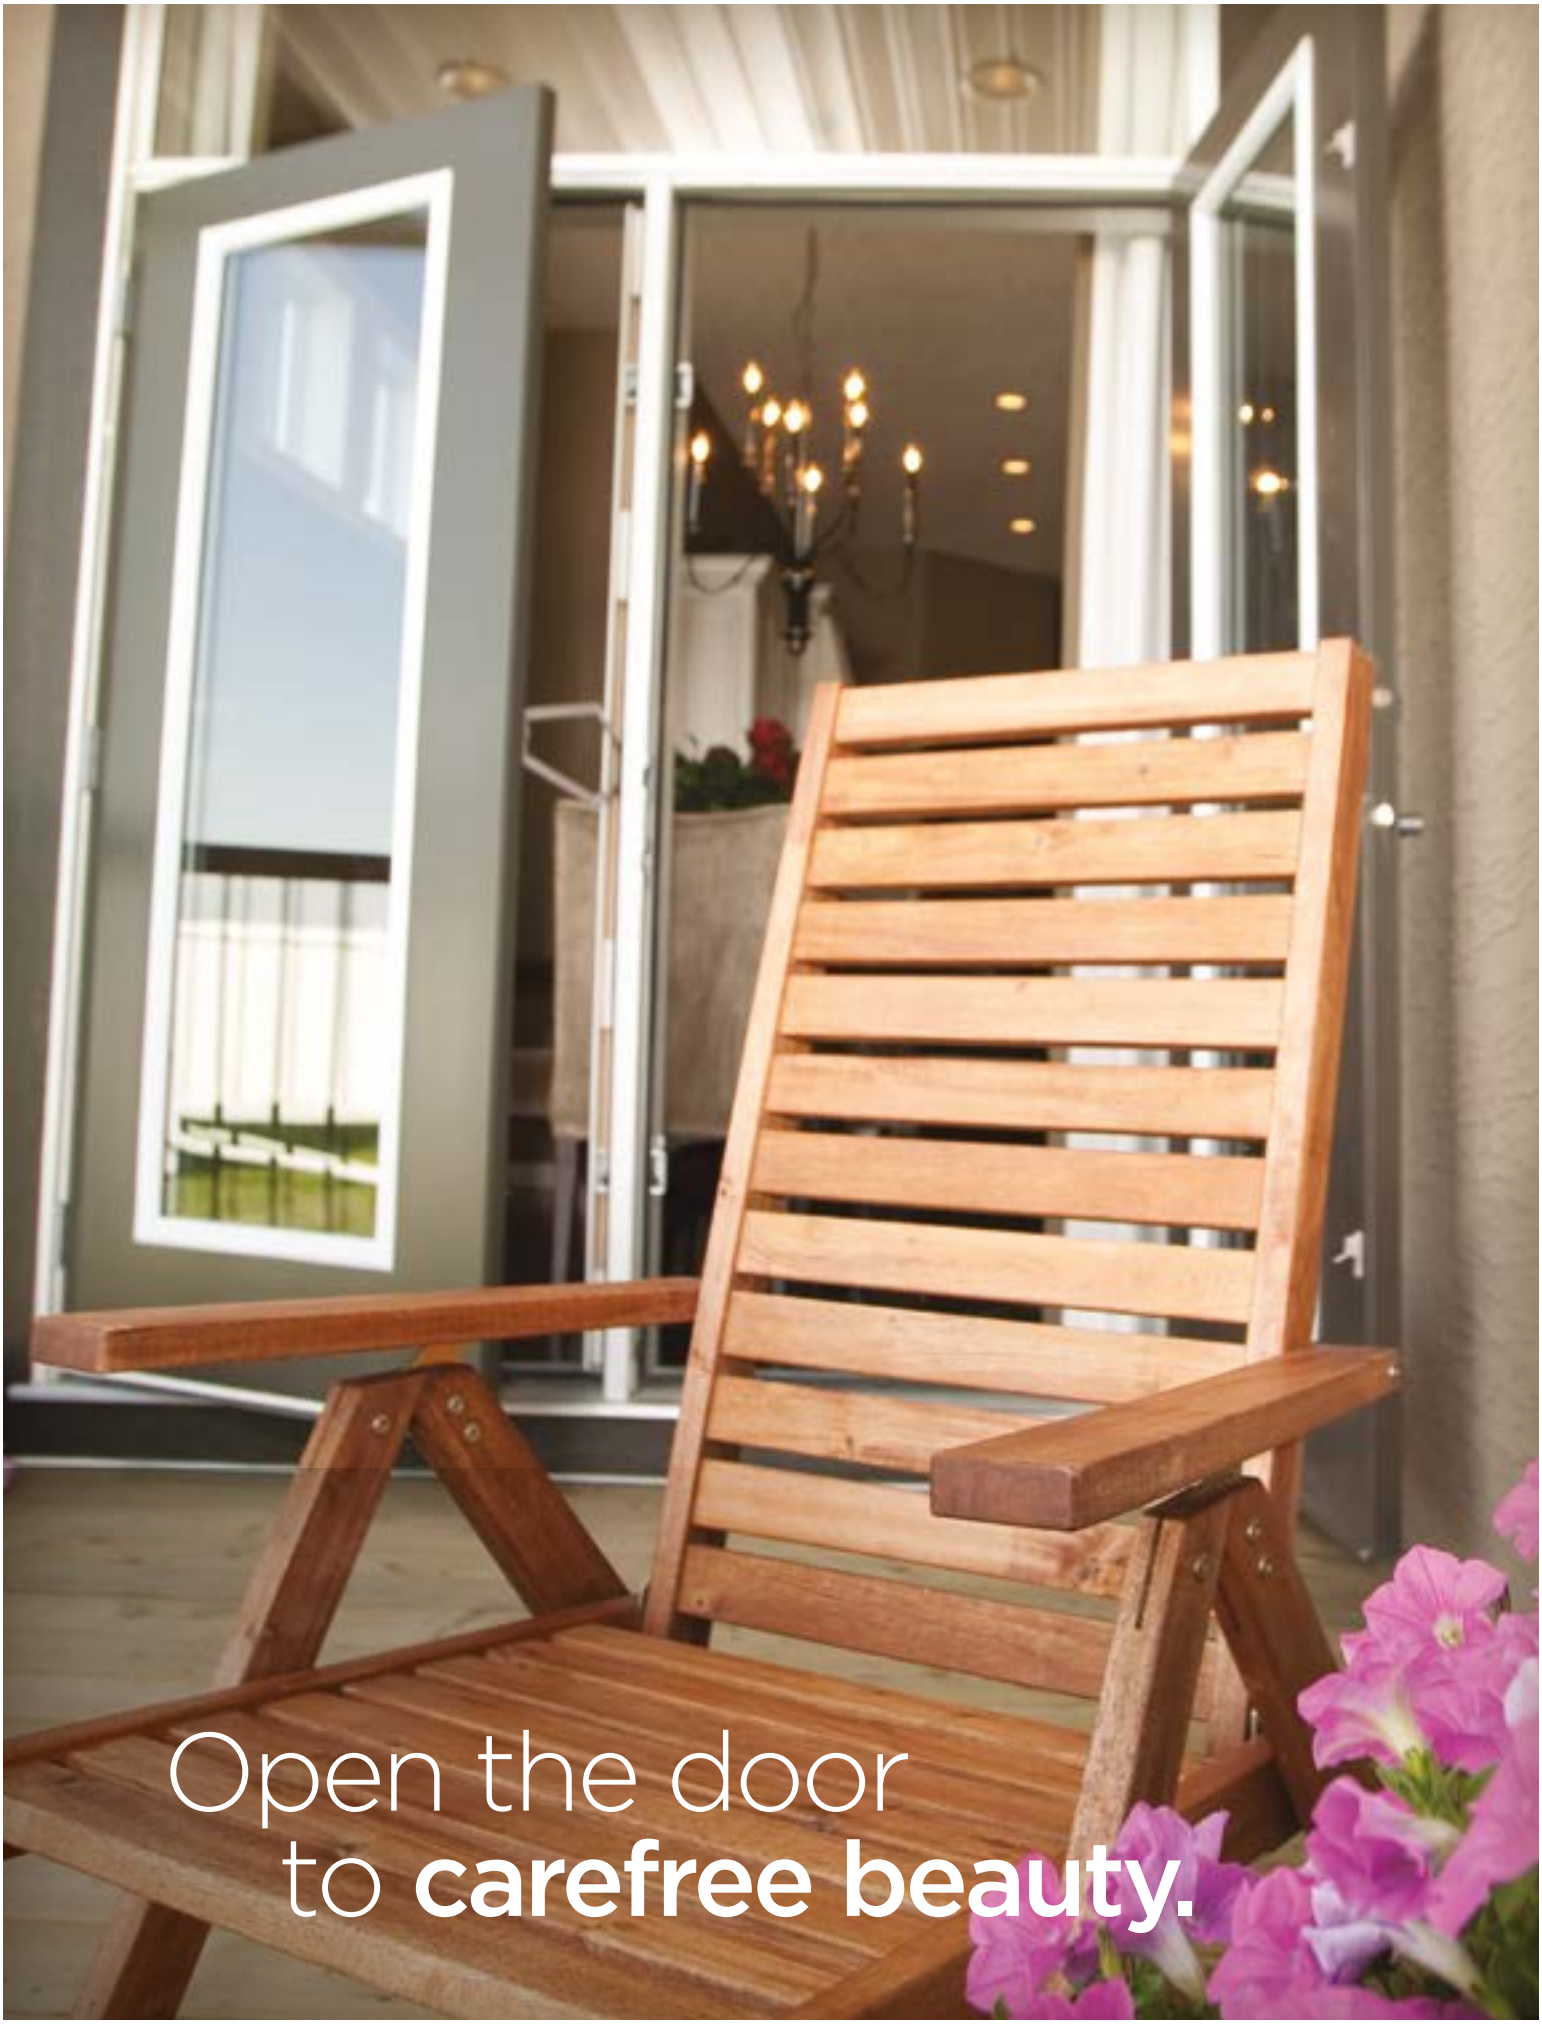

Signature Series
Features and Benefits

- Beautiful furniture grade wood can be stained or painted to suit your décor.
- 4-1/2″ stile and top rail with 7-1/4″ bottom rail design provides authentic look of a French door
- Featuring laminated veneer lumber, panels are doweled, glued and fastened together
- Fully extruded aluminum cladding on the exterior to protect from the elements
- Larger glass area than a traditional steel or fiberglass door
- Available with a variety of energy efficient Eco gain glass styles
- Available with a variety of tinted glass colours or obscure glass patterns
- Available with 1″ SDL or 2″ SML's or with in glass grilles
- Standard adjustable hinges for a lifetime of smooth operation
- Available in inswing or outswing styles, as a single or a traditional double door with astragal
- Also available as a double or triple inswing Garden door, complete with sliding screen

Open the door
to **carefree beauty.**

Garden **Doors**

Let in a breeze to cool off or to air out your house with the fresh scent of the outdoors. Being half of each, the Garden Door gives you the option of full length window ventilation with the look of a door.

Leave the door open and your cares behind.

Our hinged garden doors offer a stylish alternative to sliding doors. In-swing or out-swing doors can be configured on the left or right. Out-swing doors are ideal where space is tight.

STYLES

Out-swing configurations feature a venting panel; in-swing configurations have a sliding screen.

HIGH-PERFORMANCE DOOR SILL

All Ply Gem door systems are now available with a new High Performance Door Sill that not only looks great, but also meets new North American Fenestration Standard (NAFS) requirements across Canada. Mill finished aluminum comes standard or a bronzed anodized sill is also available.

HINGE OPTIONS

Spring Hinges are available for use in garage-to-house doors or anywhere where a self-closing door is desired. Adjustable hinges are a great alternative to ensure heavier doors will swing smoothly for the lifetime of the door.

BALL BEARING HINGE

ADJUSTABLE HINGE

STANDARD HINGE

Doors feature a stylish radius hinge detail (some exceptions may apply).

SENTRY™ MULTI-POINT LOCK

By securing the door to its frame at multiple points, the Sentry™ Multi-Point Lock ensures greater security and improved weather seal than a regular locking system. Available for Signature Hinged Patio and Fiberglass Doors (not available in Steel).

"Babysitter" feature allows dead bolt to be locked without engaging the multi-point, ensuring a locked door even if someone is unfamiliar with the multi-point locking feature.

Progressive steel hook bolts grab hold of frame for extra security and improved weather seal.

Anti-slam feature prevents hook bolts from emerging while door is open, eliminating damage to the frame and locking system.

Handset-activated shoot bolts for passive side of double doors allows for easy opening of both doors.

MULTI-POINT DOOR HARDWARE

Multi-Point Lock hardware ensures greater security and improved weather seal. Available in five styles and ten finishes they allow you to customize the look of your door to match your décor.

STANDARD DOORLITES

Standard doorlite styles can be customized with grilles in a variety of colours and finishes. Doorlites are available with all glass options including: Eco Max Shield Glass, Eco Shield Glass, Eco Gain Glass and obscure glass.

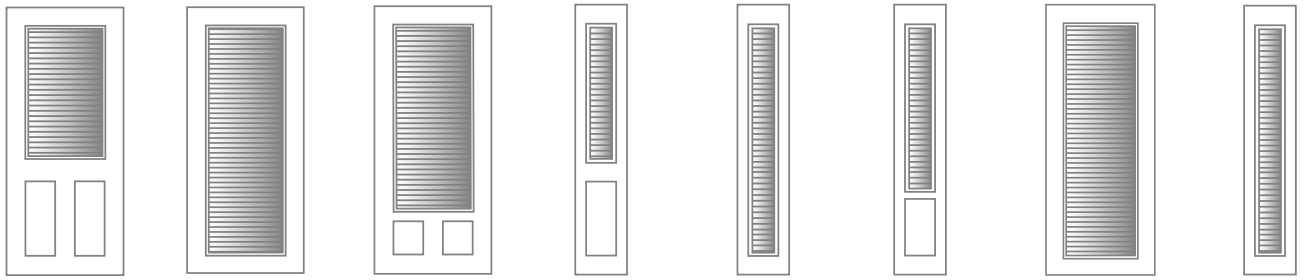

22" x 36" | 22" x 48" | 20" x 64" | 22" x 64" | 12" x 12" (3 or 4 inserts) | 22" x 10" | 8" x 36"

7" x 64" | 25" x 15" | 22" x 12" | 25" x 15" (1 or 3 inserts) | 22" x 17" | 8" x 36" | 8" x 48" | 8" x 64"

INTERNAL BLINDS

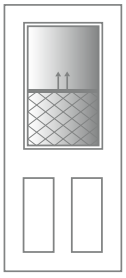

Doorlites with internal blinds are a great alternative to after-market window coverings for their ease of maintenance, durability and aesthetic appeal. Best of all, they are sealed in a dust-free environment, making them virtually maintenance-free. Available with clear or Low-E glass. All internal blinds are raise and lower and tilt and are available in white or tan, with double glazing.

22" x 36" | 20" x 64" | 22" x 48" | 8" x 36" | 7" x 64" | 8" x 48" | 22" x 80" | 8" x 80"

VENTING INSERTS

Enjoy the fresh air with an easy-open lower sash. Available with clear or Low-E argon glass.

22" x 36"

FLUSH GLAZED GLASS

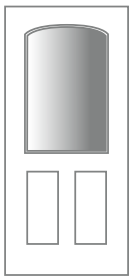

Our flush-glazed door panels offer a bigger view and more time to enjoy it. That's because the smoother profile collects less dust and is easier to clean. Flush-glazed doors are available with all of our glass options. Optional in-glass blinds or grilles make cleaning a breeze.

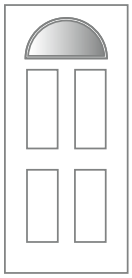

Flush glaze is available with 32" and 36" full glass on both 6'8" and 8' height Fiber Stain Oak and Fiber Tuff entry doors as well as 14" sidelites (except mini blinds).

Adelaide™, Artisan™, Auburn™, Canterbury™, Granville™, Harlow™, Hollister™, Lexington™, Modena™, Narrows™, Perimeter™, Royston™, Solutions Series™, Sullivan™, Waterton™ decorative glass options are supplied by Trimlite.

PAINTING YOUR FIBERGLASS DOOR

STEP 1: PREPARE THE FIBERGLASS SURFACE

- Lay door horizontally on sawhorses or a table.
- Remove all the hardware and tape off anything that should not be painted, including the glass insert.
- DO NOT SAND GRAINED FIBER STAIN DOORS.

  If you have a **Fiber Stain** door, move on to the next step.

  If you have a **Fiber Tuff** door, lightly scuff sand the surface with a fine sandpaper.
- Wipe the door with acetone to clean the surface. Allow acetone to dry completely before paint application.*
- Apply primer with a 4" brush beginning with the panels. Follow the manufacturer's instructions for drying time before applying topcoat.
- The primer must be completely dry before applying the topcoat.

STEP 2: APPLY PAINT**

- Apply exterior grade paint with 4" brush beginning with the panels and working your way outward.
- It is a common choice to paint both stiles the same colour as the exterior side of the door. If you need to apply a second coat, follow the manufacturer's instructions for drying time between coats.

* Do not use hydrocarbon-based solvents to clean the surface as such products may leave a residue.

** When using stains, mineral spirits, paints or other hazardous materials, always read and follow the manufacturer's instructions. Ply Gem, Inc. makes no representations as to the proper use of other manufacturers' products. Even a well-finished fiberglass door will be affected by exposure and weathering from sun, moisture and air pollutants. It is considered normal maintenance to reapply the topcoat approximately every two years.

NECESSARY MATERIALS

- **Lint-free cloth**
- **Acetone**
- **Rubber gloves**
- **Masking tape**
- **4" bristle brush**
- **320-400 grit sandpaper (Fiber Tuff only)**
- **Acrylic-based primer/acrylic latex-based exterior grade paint (for water-based application**

STAINING YOUR FIBER STAIN DOOR

STEP 1: PREPARE THE FIBERGLASS SURFACE

- Lay door horizontally on sawhorses or a table.
- Remove all the hardware and tape off anything that should not be stained, including the glass insert.
- DO NOT SAND FIBER STAIN DOORS. This will ruin the wooden appearance.
- Wipe the door with mineral spirits or acetone to clean the surface.
- Allow it to dry completely before stain application.

STEP 2: APPLY STAIN**

- Starting at the centre of the door, stain one to two panels at a time.
- Apply stain with a 3″ to 4″ brush, or rag. Apply enough stain to fill the door grain as the surface of the door is uneven.
- With a clean, lint-free cloth, softly wipe the surface until you reach your desired tone. When the rag becomes saturated with stain, refold to work with a less saturated section. It is recommended that you use the same rag for staining the entire door.
- After all the stain is brushed or rubbed evenly, you may add finishing touches by using a small 1″ to 2″ brush, or cotton swabs.
- Allow the door to dry for at least 48 hours. Then apply a second coat using the same steps listed above.

STEP 3: APPLY PROTECTIVE TOPCOAT

- After stain has completely dried (48 hours), apply a polyurethane topcoat with UV inhibitors using a clean, dry 2″ soft-bristle brush or 3″ to 4″ foam brush. Be sure to stop when the grain changes direction.
- Apply two or three coats of finish, allowing at least 24 hours of drying time between each application.

NECESSARY MATERIALS

- **Lint-free cloth**
- **Mineral spirits**
- **Rubber gloves**
- **Masking tape**
- **3″ or 4″ bristle brush**
- **Gel stain**
